Fallingst Technologies LLC
NextGen Technology Advisory and IP Valuation Firm

**biz
profile**

WHO WE ARE

Fallingst Technologies LLC is a [leading provider of advisory, asset management, IP valuation, and financing services](#). Our focus spans deep technology, healthcare, life sciences, industry, and consumer product markets. We collaborate closely with companies aiming to scale their transformative ideas, technologies, and products. For emerging IP-centric companies, we are particularly dedicated to establishing a pathway that fosters a robust pipeline of IP assets and associated capital sources to support their business endeavors.

OUR SERVICES

We offer a full range of technology advisory, asset management and IP valuation & lending services:

- IP Advisory & Valuation
- IP Backed Non-dilutive Financing (Debt Finance)
- Technology Advisory
- The 'BOSS' Program (Equity Finance)
- Asset Management
- Smart Tech Lending Program

OUR PARTNERS

An essential component of the financing program includes our Insurance [Underwriting Partners](#) who provide the necessary collateral protection insurance coverage used to “wrap” the IP assets for lending purposes. Fallingst has established partnerships with a variety of large commercial insurance brokers, wholesalers, carriers in North America and Europe and Rest of the World (RoW). Our partnership also extends over to both Managing General Agents (MGAs) and Managing General Underwriters (MGUs).

We help our clients by partnering with [Private Credit and Equity Firms](#) to help facilitate the funding sources behind our IP-backed debt structured financing packages. These private debt firms provide credit facility transactions (a form of Collateralized Debt Obligations [CDO] leveraged financing option) using the insurance policy as an attractive securitization vehicle to hedge against potential losses.

OUR BUSINESS VALUE PROPOSITION

Our independent IP valuation services help innovative companies gain and keep the upper hand on the competition, increase attention from the capital markets, support share prices, and secure funding opportunities that articulate the marketability strength and value of their intellectual property assets.
